

Hector Carpio

SOFTWARE ENGINEER /
DEVELOPMENT AND TESTER

About

I'm a man that likes focusing on solutions not on the problem, with a grate passion for technology, Inovacion in software and anime. As part as my background I have skills sush as programation, quality control, server management, website development, data analysis, digital marketing, image control, business intelligence, and software testing. I'm an amateur on learning new things and I will never stop being one.
